

Protex Hackathon 2026

Track Details

Track 1 - AI / GenAI

- Build with large language models, RAG pipelines, multimodal AI, or agent frameworks
- Ideal for: chatbots, code assistants, document intelligence, image-text applications
- Encouraged tech: OpenAI, Anthropic Claude, LangChain, LlamaIndex, HuggingFace

Track 2 - Agentic AI / AI Workflows

- Build autonomous agents capable of multi-step reasoning and real-world task execution
- Ideal for: web browsing agents, code-executing bots, automated research pipelines
- Encouraged tech: AutoGen, CrewAI, LangGraph, tool-use APIs

Track 3 - Personal Finance & Wealth

- Target Gen Z users with accessible, smart, and engaging financial tools
- Ideal for: investment advisors, tax filing helpers, retirement calculators, budget trackers
- Encouraged tech: financial APIs, data visualization, ML-based recommendations

Track 4 - Open Innovation

- No domain restriction — solve any real-world problem that matters to you
- Ideal for: social impact apps, productivity tools, civic tech, healthcare, education
- Judged on innovation, impact, execution, and feasibility
